WORK PLAN

&

METHODOLOGY

5. WORK PLAN

- Work Completed –
  - Study of different Artificial Neural Network Algorithms.
  - Study of Matlab- Neural Networks Toolbox
  - Study of Sharemarket.
  - Study of Liturature Survey.

- Work Ahead –
  - Select the type of NN to analyse the forecasting market system.
  - Collect the database i.e. price index values of certain companies for few years.
  - Arrange the databade.
  - Train the Neural Netwok according to the selected algorithm.
  - Apply the NN to the statement problem.
